

# ISAT 480—Special Topics in ISAT

---

TOPIC: Quantified Self and Chronic Conditions

3 credit hours

## Course Description

This is the second course in a three-course sequence. Student performs the bulk of the research needed for an independent research project, either alone or within an investigative team, to address a technologically based problem.

## Course Objectives

The primary goal of this course should be for you to grow as an academic and a professional. This is the time for you to work on things like conscientiousness, attention to detail, personal organization and time management, initiative, and focus. This is a real opportunity for you to demonstrate to your professors, potential employers, graduate schools, your peers, and your family, and yourself that you have become an educated and enlightened citizen who will lead a meaningful and productive life. It is also a time to deepen your skills and your knowledge in the areas related to the problem you have chosen to solve, and to broaden your outlook so that you can see many of the potential solutions.

## Course Content

You will meet weekly with your instructor at a time that is mutually agreed upon at the beginning of the semester. At each weekly meeting you are expected to make an account of your progress over the past week on your project, and to demonstrate forward momentum at a pace that will ensure the successful completion of your project.

## Evaluation

You will receive feedback at least weekly from your instructor during your weekly meeting. Most of this will be verbal. Your instructor will assign a grade for you at the end of the semester that reflects his impression of the quality and quantity of progress made on the project up until that point.

## Project Scope

Please be aware that the scope of your senior project is subject to change and may or may not reflect the quantity of work outlined in the project proposal. This means that the scope may be expanded or reduced to take into account the changing

situations that will occur naturally as you make progress. Although there may not be a formal agreement as to scope changes, i.e. in writing, the amount of work to be done should be reasonable and mutually agreed upon. If you are unsure of whether or not you are making sufficient progress and covering significant territory, please address this with your advisor promptly.

## Attendance Policy

Your weekly meetings with your instructor are mandatory. If you need to reschedule please do so, but failing to show up is likely to bring serious consequences.

## Other Policies

You can see other JMU policies regarding add/drop, inclement weather, disability accommodations, and religious observances can be found at <http://www.jmu.edu/syllabus>

## Your Prof

Name: Morgan Benton

Office: HHS 3224

Office Hours: Mondays 2-4, or other times by appointment

Office Phone: 540 568 6876

Cell Phone: 973 495 7736 (calls and texts are ok within reason)

Calendar: my [Google calendar](#) is usually pretty accurate

Email: bentonmc@jmu.edu
